

Week 26

Elements of conjuncture

The volumes of the week are down. There are only late varieties like Kordia and Regina. Operators estimate a end of campaign delivery within 10 days. At the level of prices, they are stable at the level of delivery and in an upward trend among brokers. The demand is a bit more timid due to the competition of other seasonal fruits like peaches, nectarines and apricots. Red cherry of calibre 24+ is negotiated on average at 5.25 euros per kilo. In organic production, the price of red cherry in calibre 26+ is around 7.00 euros per kilo. The quality of the fruits remains correct despite a weather with very high temperatures.
